Instructor feedback

Sir your method of teaching is very good. The way you present, is very different and unique .your slides are very helpful and easily readable. Materials of your slides is very perfect .I highly recommended these slides .your examples related to python make my concept more clear like in last class about list etc. which help me to clear my concept in c++.so at end I say that, the way you teach is good. I requested you, your lab task is very easy which is not good. If you gave difficult lab task we work hard to solve this which is difficult for us right now but it will helpful for our future, and our logic building will be

strong which is good. That's all.thankyou, stay blessed. Have a good day.
